

Townhomes

Driven by an emphasis on design, superior craftsmanship and our own experiences, we're committed to building the best homes for our families. We partner with the finest planners, architects, engineers and trades to ensure we don't just build houses but build homes.

Construction

1. All homes are built with brick exteriors and stone accents. Elevations are aesthetically driven to maintain a unique streetscape, balance and tone in the existing site and with neighbouring units.
2. Long-life, prefinished, maintenance-free soffit, eavestrough and downspout in aluminum as per builder samples.
3. Quality self-sealing, 50-year asphalt shingles.
4. Soldier coursing, brick arches, keystones and other masonry detailing as per elevation.
5. Weather stripping on all exterior doors except the garage doors.
6. Steel, dent-resistant, insulated front entry door with glass inserts as per plan.
7. Composite, pre-painted sectional garage doors as per builder colours.
8. All sliding patio doors to be double-glazed PVC with Low-E glass.
9. All windows are to be double-glazed PVC with Low-E glass. All operating windows are to be screened. All operable windows on the first and second floors will be casement throughout with decorative bars on the front elevation as per plan.
10. All basement windows to be double-glazed PVC sliders with Low-E glass.
11. Corrugated galvanized steel window wells may be required on rear and side windows in basement as per grading conditions at builder discretion.
12. All garage walls to be completed with drywall and gas proofed to code.
13. Entire lot graded and sodded as per plan.
14. Precast concrete slab walkway to front entry.

Specifications are approximate and subject to change without notice. Builder may substitute materials with those of equal or better quality as determined by the builder's architect. Installed features and finishes may vary from builder's samples as a result of manufacturing and installation process. Decorative and upgraded items in furnished model home and sales office are for display purposes only and not included in purchase price. E. & O.E.

OBC=Ontario Building Code, ESA=Electrical Safety Authority, PDI=Pre-delivery Inspection, CO=Carbon Monoxide, HVAC=Heating Ventilation and Air Conditioning.

15. Exterior water tap installed in attached garage and at rear of house as per applicable plan.
16. Some rear yards may have access from house via a small deck with stairs depending on the grade and as per builder discretion.
17. Architecturally predetermined exterior colours on sides and rear elevations to match.
18. All exterior finishes and colours are selected by the builder design team.
19. Basement to be poured concrete with drainage layer and weeping tiles where applicable.
20. Paved driveways at homeowner cost of \$1,850 + HST on closing within 18 months of closing.
21. Optional rough-in three-piece plumbing in basement for future bathroom (drains only; no water lines).
22. Kettlebeck will work with homeowners to upgrade their homes in their individual preferences and options for a unique layout and colours.
23. Ceilings finished in California-texture-style plaster throughout the home.
24. Master bedroom complete with ensuite and closet as per design.
25. Quality textured wood doors on all closets and bedrooms in two-panel modern lines.

Kitchen

27. Choice of custom-quality finished cabinets and countertops from vendor's samples.
28. Standard 40" upper cabinets in kitchens as per vendor's samples.
29. Standard double stainless steel sink.
30. Vented exhaust fan over stove.
31. Rough-in plumbing and electrical for future dishwasher.
32. Heavy-duty wiring and receptacle for electrical stove.

Interiors

22. Soaring 9' ceilings throughout the main floor.

Specifications are approximate and subject to change without notice. Builder may substitute materials with those of equal or better quality as determined by the builder's architect. Installed features and finishes may vary from builder's samples as a result of manufacturing and installation process. Decorative and upgraded items in furnished model home and sales office are for display purposes only and not included in purchase price. E. & O.E.

OBC=Ontario Building Code, ESA=Electrical Safety Authority, PDI=Pre-delivery Inspection, CO=Carbon Monoxide, HVAC=Heating Ventilation and Air Conditioning.

61. Premium satin-finish hardware on all interior and exterior doors. Dead bolt on side door entry, garage door and main entry door where applicable. Side and garage man doors are optional.

62. Exterior satin-finish grip set with dead bolt on main entry door.

Electrical

63. Circuit breaker panel with 200 Amp service.

64. All wiring in accordance with Ontario Hydro Standards and approved by ESA.

65. Light fixtures provided in all rooms except the living room.

66. Exterior lights on garages and front porch on front elevation as per electrical plan.

67. Two exterior waterproof electrical outlets: one (1) at the rear of the house and one (1) in the porch area with covered box and on a breaker circuit.

- 68. Mechanical exhaust fan in all washrooms as per plan.
- 69. Decora switches throughout the house.
- 70. Electrical outlet for future garage door opener in the garage ceiling.
- 71. Electric car charging plug in garage.
- 72. Standard CO and smoke detector on all floors as per the new OBC and safety bylaws.
- 73. Combination smoke detector/carbon monoxide detector in upper hallway and bedrooms as per the new OBC.
- 74. Rough-in central vacuum outlets dropped to garages and basement ceilings.
- 75. Electrical door chimes.
- 76. One (1) rough-in cable T.V. outlet each in the family room and master bedroom.
- 77. Prewired for one (1) telephone jack each in the family room and master bedroom.

Heating/Air Conditioning/Insulation

- 78. High-efficiency forced-air gas furnace. Location may vary from plan.
- 79. Hot water tank-gas rental unit. Location may vary from plan.
- 80. Ducts sized for future air conditioning.
- 81. Exterior walls to be 2" x 6" with R22 as per OBC.
- 82. Attic insulation to be R50 or better.
- 83. R12/R20 or better insulation to be installed within approximately 4" above the basement slab in the unfinished basement area with a vapour barrier nailed into the walls as per HVAC energy package for each house as per OBC.

Painting

- 84. Interior walls painted in builder's off-white colour in a flat texture.
- 85. All trim and interior doors painted in white with semi-gloss finish.

Specifications are approximate and subject to change without notice. Builder may substitute materials with those of equal or better quality as determined by the builder's architect. Installed features and finishes may vary from builder's samples as a result of manufacturing and installation process.
